

## Path

**Music Room – Elevator – Rm. 16 – Rm. 2 – Gym – Rm. A – Cafe – Office – Library – Art – Rm. 21 – Rm. 10**

### Music Room to Elevator

Too tired to walk up a flight of stairs find the place to make the trip from floor 1 to floor 2 as quick as a hare.

### Elevator to Rm.16

Head to a room that is a two digit square number.

What is a square number you may ask this is definitely a math task.

Take a number whose array forms a square and you are there

### Rm. 16 to Rm. 2

To find the next class you take the number of sides of a snowflake and divide by 3.

### Rm. 2 to Gym

Finding the next room might be a hurdle but be a good sport and head to a place where you play on a court.

### Gym to Rm. A

Roses are red

Violets aren't gray

I give you this clue

So now go to room \_\_\_\_\_

(Where can you go that rhymes with gray?)

### Rm. A to Cafe

I have a hunch you will know where to go it is the location of where you eat lunch.

### Cafe to Office

A word riddle I have for you if you solve it you can find your next clue.

Opposite of "on" + frozen water = \_\_\_\_\_

### Office to Library

Head to the place that has the most stories

I am not talking about floors here but where you can find

Pages that broaden your mind.

### Library to Art

Creative minds head this way – to a place filled with color.

If you are unsure where to be –

I shall paint you a picture like Davinci.

### Art to Rm. 21

Rise above the rest and head toward a room that is a two digit odd number with factors of 7 and 3

That is where you should be!

### Rm. 21 to Rm. 10

Now on to a room that is  $\frac{2}{5}$  of 25.

If you are confused here is a clue – think of how many nickels are in a quarter.

If you know  $\frac{3}{5}$  of a quarter is \$0.15 then finding  $\frac{2}{5}$  will surely make sense!

### Rm. 10 to Music Room

You must take note – to find this room hum a good tune and go to the place where if you want to sing a song this is where you belong.
